Mabel Smithers, a friend of the deceased, testified to having seen her on the fatal night with a well-dressed man. Witness further stated that the deceased was the wife of Lord Chalmers, and that she (Miss Smithers) had written to him at her roquest a few days prior to the murder.

He was subsequently informed by Crawford that his wife was dead, and after four years had elapsed married an American girl and soon after returned to England to find that his father was dead and that he had succeeded to his title.

Ten days before the murder he received a letter signed, apparently, by his first wife, in which she demanded recognition. He showed the letter to Crawford, who pronounced it a hoax. Two days later he met his wife in front of his house, and induced her to keep silence until he could think what was best to do. The present Lady Chalmers was unaware of her existence, and his brother, Hon, Hugh Byham, was intrusted with the secret. Lord Chalmers seeks Crawford for an explanation, but cannot find him.
